WELCOME TO AGROECOLOGY EUROPE FORUM 2025!

WELCOME TO THE 5TH AGROECOLOGY EUROPE FORUM - FOR THE FIRST TIME IN THE NORDICS!

The Agroecology Europe Forums - from Lyon, to Heraklion, Barcelona and Gyöngyös - have brought us many cherished memories: long train rides, field trips, inspiring sessions, fantastic food, new insights and friends from all over Europe. Now it's time for us to give back to the community.

Our vision: Transformation in action!

It's time to act. We invite you to contribute to our call to action: the Malmö Declaration. Bring your visions, insight, best practices and strategies for transformative action. Visit our time machine to find out more!

We are so excited that you are finally here and we can't wait to share this rich programme with you. More than 130 co-creators are contributing with over 70 sessions for all of us to enjoy. To gather in-person also offers us an important moment to focus on social relations within our movement. Take your time to mingle around, meet new and old friends, and embrace the Agroecology movement across Europe - and don't forget to dance!

As food lovers, we are extra proud to present the venue, Folk Mat & Möten, a former Folkets hus (People's House), where social movements have mobilised and thrived before. It also happens to be our favorite restaurant in Malmö. They will be serving us delicious food, drinks and fika (Swedish coffee break). Thanks a million for the collaboration and for supporting our volunteers with amazing food! And while we're at it, a heartfelt thanks to our volunteers, co-creators, partners, sponsors, our fantastic team, and of course our families that have supported us throughout this crazy journey.

The **science** is clear, the **practice** has already started and the **movement** is building up. People have come from all over Europe and beyond.

Let the magic begin!

With love,
on behalf of the organisers,
Jessica Johansson

Project lead, MiljöMatematik Malmö AB

THE VISION

The Agroecology Europe Forum 2025 is designed to take all of you on a three day journey, celebrating agroecology and mobilising for action! To support this vision, each day has its own theme, taking us from visions, through potential solutions and concrete steps for action.

A "JOMO" PROGRAMME

The programme is a co-created, living display of the richness of agroecology and our movement. We encourage you to embrace the "JOMO" - joy of missing out - during these days.

Stay in the present, and follow your curiosity, explore the venue for hidden gems or even take a walk outside.

As co-creation is a continuous process, we invite you all to contribute to the Forum with us and act as co-organisers: please distribute evenly between rooms and be in time as seating is limited. Let's look after this space together!

Lastly, we invite you to co-create the Malmö Declaration with us as a joint effort to walk the talk and showcase the theme of the Forum: Transformation in Action!

GREETINGS FROM THE CHEFS AT FOLK MAT & MÖTEN

"We cook modern soul food with a Scandinavian touch where innovation goes hand in hand with the best we can get from our local producers.

Then we mix it with inspiration from all corners of the world just like the diversity in the Malmö we love.

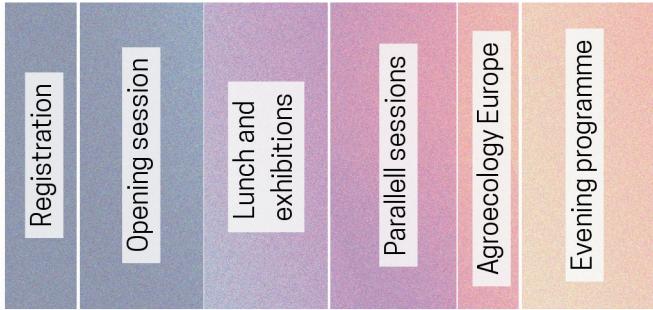

The menu is seasonal, local and agroecologically sourced. Sometimes it's not harder than that. Questions? Ask us when we serve your meal. See you in the kitchen!"

Cheers,
Rasmus Johansen, Karl Berggren & Mattias Langeryd

Visioning is a key approach in sustainability science and practice, making it particularly relevant for agroecological initiatives. We define a vision as a powerful mental image of a desired future. For visions to drive meaningful action, they must surpass mere intellectual understanding (formal rationality) and engage deeper emotional and purposeful dimensions. To strengthen their impact, visions should be experienced rather than simply discussed. Our intention in this workshop is to give the participants an opportunity to experience their own ability to envision a desired future state relevant to agroecological transformation.
